COPYRIGHT STATEMENT

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

RELIEF EXPENDITURES BY GOVERNMENTAL AND PRIVATE ORGANIZATIONS

INTRODUCTION

Purpose of the inquiry.—The purpose of this inquiry, undertaken at the request of the President's Organization on Unemployment Relief, was to obtain, for comparison, data as to the expenditures for relief by organized agencies during the first three months of 1929 and during the same months of 1931; also as to the number of families receiving relief, the number of persons in such families, the number of lodgings given homeless men, and the number of meals served during the same periods. Since the earlier period was one in which industrial conditions were good, while the later period represented probably the peak relief load for any 3-month period up to the time when the inquiry was begun in August, 1931, it was believed that the increase would furnish the basis for estimating the amount of relief chargeable to the business depression in the areas and for the period covered by the inquiry.

Collection of the data.—Information regarding relief expenditures in cities of over 30,000 was either supplied by the Department of Statistics of the Russell Sage Foundation and the United States Children's Bureau through previously established reporting contacts with relief agencies, community chests, and councils in most of the larger cities in connection with monthly collection of relief statistics, or was obtained by the Bureau of the Census through its agents. The reports covering expenditures for relief in cities having less than 30,000 population and by county governments were obtained by the Census Bureau through correspondence with postmasters and county officials.

Sources of information.—Data supplied by the Children's Bureau were obtained for the most part from a central reporting agency, usually the community chest or council, in each city, and data furnished by the Department of Statistics of the Russell Sage Foundation were obtained from governmental and private relief agencies. The Census Bureau obtained statistics for governmental expenditures from the mayor, city comptroller, auditor, or other financial officer of a city, or from other public officials, and the data for private organizations from community chests, welfare federations, councils of social agencies, family welfare associations, or other community-wide family welfare agencies. The reports received from cities having a population of 30,000 or over were compiled according to source of relief —whether from private or governmental organizations.

Relief organizations included.—The names of relief organizations vary widely. For example, the Family Welfare Association, Associated Charities, and United Charities, are names frequently used for

the same type of agency. The following is an illustrative list of agencies included:

Government organizations giving home relief—

1. City relief department, sometimes known as Department of Public Welfare, City Bureau of Charity, Charities Division.
2. County officials and county boards administering poor-relief funds, sometimes known as County Board of Public Welfare or Child Welfare, County Commissioners, County Court, Fiscal Court, County Judge.
3. Public officials administering—
   - Mothers' or widows' aid.
   - Old age aid.
   - Blind aid.
   - Veterans' aid (local).
   - State relief funds.
4. Town or township overseers or trustees or commissioners of the poor.

Appropriations by Government organizations to any of the private organizations reported are not included in the figures for Government organizations, but are included in the figures for private organizations.

Private organizations giving home relief—

1. Family Welfare Association, Associated or United Charities, or other nonsectarian community-wide agencies.
2. Agencies or bureaus under religious auspices organized primarily for relief and charitable purposes (such as bureaus of Catholic charities, Lutheran, and other Protestant relief agencies).
3. Jewish charities, councils of Jewish women, or other racial relief organizations.
4. Salvation Army (family relief only).
5. Volunteers of America (family relief only).
6. Red Cross.
7. American Legion and other veterans' organizations.
8. Settlement houses (where they have relief budgets).
9. Emergency committees, including those requiring work in return for relief.

Organizations giving aid to homeless men—

- Emergency shelters.
- Municipal lodging houses.
- Police departments.
- Salvation Army.
- Seamen's Institute.
- Travelers' Aid.
- Union missions and other missions.
- Volunteers of America.

Forms of relief.—The forms of relief extended to families include relief to special classes, such as mothers' aid; veterans' aid (local); blind aid; old age aid; and State relief funds; as well as direct relief orders and other general dependency aid. Wages paid for work provided to assist the unemployed are included in total amounts expended, if given instead of relief as a definite part of the relief program; and families receiving such wages are included in number of families receiving relief.

Organizations not included.—The following organizations are not included in this study:

- Individual schools, and school relief unless it assumes a considerable share of the total relief program in the community.
- Fraternal organizations.
- Individual church organizations.
- Welfare departments of industries.

Hotels operated for profit, and sheltered industries, such as workshops for the blind or crippled persons, are not included. Y. M. C. A. hotels are not included unless they furnish free lodgings as part of their program.

The statistics for cities having a population of 30,000 and over are presented separately for governmental organizations and private organizations. For cities and towns having less than 30,000 population the figures for governmental and private organizations are combined. The statistics for the counties are for governmental organizations only.

Completeness of reports.—The financial data obtained were intended to represent actual relief expenditures plus cost of administration. For many agencies, however, the cost of administering relief could not readily be segregated and only the amount of relief granted was reported. It is particularly difficult to determine the cost of administering relief when an agency giving relief is a division of an organization with broader functions, and also to apportion accurately county-wide expenditures as between cities and nonurban areas.

A considerable number of agencies also reported financial data without reporting the number of families aided or the number of persons in such families.

For reasons stated, the amounts expended are undoubtedly to be taken as an understatement, for both periods covered by this report, of total expenditures for relief and administration, but they afford the best measure which it has been possible to secure. The financial figures are more nearly complete than those for families aided, and those figures, in turn, are more nearly accurate than those for persons in families receiving relief.

SUMMARY OF RESULTS

Returns were received from all of the 93 cities of 100,000 population or over; from all but one of the 217 cities of from 30,000 to 100,000; from 4,863 out of 5,938 cities or incorporated places of from 1,000 to 30,000; and from 6,353 smaller incorporated places.

The total population of the cities or other incorporated places for which reports were received represents 89.2 per cent of the total population of all cities and incorporated places, and 57.4 per cent of the total population of the United States.

Reports covering county governmental relief were received from 1,716 counties out of a total of 3,073. Of this number 377 reported no relief expenditures by the county government. The counties reporting comprised 34.2 per cent of the total population of the United States.

The total expenditures, including cost of administration, reported by governmental and private organized agencies for family relief (outside of institutions) and for relief to homeless men in the areas for which returns were received amounted to $22,338,144 in January, February, and March, 1929, and to $73,757,300 during the corresponding three months (January, February, March) of 1931. The increase of $51,419,156, or $17,139,719 per month for the 3-month period of 1931 compared with the same three months of 1929 may fairly be attributed to the unemployment caused by the business depression. The American Red Cross provided drought relief from national funds in many localities during the winter of 1930–31. In most cases, the amount is reported by the locality and included in Tables I and II of

this report. In addition to amounts included in the grand total shown in Table I, the Red Cross reports $1,735,489 expended during the first three months of 1931, either in excess of the reports received from localities or in localities not covered by this report.

The number of families reported as receiving relief averaged 333,861 per month in the first three months of 1929 and 1,287,778 per month in the first three months of 1931, an increase of 953,917. It is generally recognized that comparatively few families require full relief from governmental or private relief organizations under ordinary conditions, since they have some individual resources and are partially self-supporting and need only supplementary assistance. With prolonged unemployment, however, the proportion of families with resources of their own steadily diminishes. With a number of agencies providing relief in most cities, there is doubtless some duplication in number of families and individuals. The average number of lodgings per night reported given to homeless men was 14,037 in the first three months of 1929 and 49,411 in the first three months of 1931.

The reports received from cities having a population of 30,000 or over were compiled according to source of relief, whether from private or from governmental organizations. With reports from 309 of the 310 cities of that size reporting family relief expenditures and 301 reporting expenditures for relief to homeless men, the investigation shows that local governmental organizations provided 65 per cent in 1929 and 60.4 per cent in 1931, and private organizations provided 35 per cent in 1929 and 39.6 per cent in 1931. The total amount of increase for the 3-month period reported by these cities was $40,047,783, and of that sum $23,398,861, or 58.4 per cent, was provided by local governmental organizations, and $16,648,922, or 41.6 per cent, by private organizations. The accuracy of these percentages depends upon whether information as to expenditures for relief and for administering relief is equally complete for the two groups—governmental and private. As previously pointed out, it is sometimes difficult to apportion county-wide expenditures as between cities and nonurban areas and also to determine cost of administration when relief is one of several functions of an organization.

In the following table the total expenditures for relief in cities having over 30,000 population during the first three months of 1929 and the same three months of 1931 are shown by geographic divisions, together with the amount and percentage of increase:

GEOGRAPHIC DIVISIONS	RELIEF IN CITIES OF OVER 30,000 POPULATION

DESCRIPTION OF TABLES

TABLE I.—*Total expenditures for relief to families outside of institutions and to homeless men in the first three months of 1929 and in the first three months of 1931, with percentage of increase and population*

Areas covered.—The reports from the individual cities having over 30,000 population relate as a rule to the relief extended to the population resident with the corporate boundaries of the city; but in a few instances they cover also the population of the surrounding territory or the metropolitan area, and in such cases the area embraces some cities which, if reported separately, would be included in the group of cities under 30,000. Four of the areas cover whole counties, including Los Angeles County, Calif.; Marion County, Ind. (Indianapolis); Dauphin and Perry Counties, Pa. (Harrisburg); and Milwaukee County, Wis.

Expenditures.—The expenditures reported include administration expenses as well as cost of actual relief. In some instances the expenditures for 1931 are not entirely comparable with those for 1929 for the reason that it was not, in all cases, possible to secure reports for both years.

The amount expended by organizations includes all money given to or spent for families outside of institutions which passed through the organization's funds. All amounts expended by the agency, including relief outside institutions, rent, light, heat, postage, transportation, salaries, or other expenses, are included. Expenditures for the care of homeless men include both governmental and private agencies that conduct lodging houses (not for profit) for homeless or transient men or that provide lodging for them in local hotels or rooming houses. Agencies that conduct soup kitchens or provide meals in local eating houses are also included. In reporting meals or lodgings paid for by noninstitutional agencies, care was taken to avoid duplication with the reports of the agencies actually giving the meals or lodgings. For example, a relief agency may pay for lodgings furnished by a Salvation Army lodging house; in such a case the meals and lodgings are reported only by the latter agency.

TABLE II.—*Average number per month of families outside of institutions receiving relief and average number of persons in such families; and average number per month of lodgings given and of meals served to homeless men during the first three months of 1929 and the first three months of 1931, with percentage of increase*

Monthly average.—The figures representing the number of families and the number of persons in families receiving relief, and the number of lodgings given and number of meals served homeless men, during the first quarter of 1929 and 1931 were arrived at by adding the totals for the first three months of 1929 and the first three months of 1931, and dividing by three.

In instances where the number of persons in families receiving relief was not reported, and the number of families was reported, the number of persons was estimated on the basis of four members to a family. In collecting these statistics care was taken to obtain the number of different families receiving aid during each month; the same family may receive from an agency two or more orders for relief during the period, but the family was counted only once, unless it was receiving relief from more than one agency.

TABLE III.—*Total expenditures for relief to families outside of institutions and relief to homeless men, for first three months of 1929 and first three months of 1931, for cities having over 30,000 population, classified by governmental and private organizations*

This table shows for individual cities having a population of over 30,000 total expenditures for relief to families outside of institutions and relief to homeless men, by governmental organizations and by private organizations:

TABLES

TABLE I.—TOTAL EXPENDITURES FOR RELIEF TO FAMILIES OUTSIDE OF INSTITUTIONS AND TO HOMELESS MEN IN THE FIRST THREE MONTHS OF 1929 AND IN THE FIRST THREE MONTHS OF 1931, WITH PERCENTAGE OF INCREASE AND POPULATION.

The cities and other incorporated places from which reports were received cover 89.2 per cent of the total population living in cities and incorporated places and 57.4 per cent of the total population of the United States.

The report for counties covers only relief extended by the county government. It does not include relief by local governments or local organizations within the county. The number of counties reporting as given in the table includes those that reported no expenditures for relief as well as those that reported such expenditures, the remaining counties being those from which no report was received.

[1] Incorporated places of less than 30,000 include a few unincorporated places for which reports were received.

[2] A minus sign (–) indicates a decrease.

TABLE II.—AVERAGE NUMBER PER MONTH OF FAMILIES OUTSIDE OF INSTITUTIONS RECEIVING RELIEF AND AVERAGE NUMBER OF PERSONS IN SUCH FAMILIES; AND AVERAGE NUMBER PER MONTH OF LODGINGS GIVEN AND OF MEALS SERVED TO HOMELESS MEN DURING THE FIRST THREE MONTHS OF 1929 AND THE FIRST THREE MONTHS OF 1931, WITH PERCENTAGE OF INCREASE

The cities and other incorporated places from which reports were received cover 89.2 per cent of the total population living in cities and incorporated places and 57.4 per cent of the total population of the United States.

The report for counties covers only relief extended by the county government. It does not include relief by local governments or local organizations within the county. The number of counties reporting as given in the table includes those that reported no expenditures for relief as well as those that reported such expenditures, the remaining counties being those from which no report was received.
